

Mykhailo Kyiko

Senior IT System Administrator | Infrastructure | Linux | VMware | Automation

Lünen, Germany • +49 174 4969629 • kiykomi@gmail.com • linkedin.com/in/kiykomi
kiykomi.github.io

IT System Administrator with 17 years of experience in infrastructure, system administration, and IT operations across research, healthcare, and corporate environments. Experienced in operating highly available Linux and Windows infrastructures, virtualization, monitoring, and automation of administrative processes. Leadership experience, strong problem-solving skills, and a clear focus on stability, security, and continuous optimization of IT systems.

SKILLS

- Infrastructure: VMware ESXi, Hyper-V, Proxmox, Veeam, Windows Server (AD, DNS, GPO), Ubuntu/Linux
- Monitoring & Ops: Zabbix, Grafana, Incident Management, Runbooks, Hesk Helpdesk
- Network & Security: MikroTik, Aruba, Ubiquiti, VPN, Hardening, Incident Response, AD Security
- Automation & DevOps: PowerShell, Bash, Python, Go, Git, GitLab CI, Docker, Terraform fundamentals
- Platforms: MS SQL, MySQL, 1C, DICOM/PACS, VoIP (Asterisk, 3CX), CCTV/ACS

WORK EXPERIENCE

IT System Administrator / IT Specialist

Institute for Occupational Research (IfADo), Dortmund
Present

11.2024 –

- **IT Operations | Service Orientation:** Ensuring stable L1/L2 support for 150+ employees and researchers, delivering reliable IT services within defined SLAs.
- **System Administration | Infrastructure Management:** Administering 15+ Linux servers, campus network, and monitoring infrastructure (Zabbix/Grafana) with over 99.5% system availability in production.
- **Automation | Process Optimization:** Developing and implementing 15+ automation solutions with PowerShell, Bash, Python, and Go, reducing manual admin effort by ~8 hours per week and minimizing errors in patch and provisioning processes.
- **Software Development | Own Initiative:** Building three internal tools for inventory, ticket handling, and process automation to speed up support and reduce handoffs.
- **Monitoring | Proactive Incident Management:** Introducing 50+ automated monitoring rules for early detection of critical system states and prevention of user-impacting outages.
- **Documentation | Knowledge Management:** Creating 25+ runbooks and SOPs to standardize admin processes and reduce recurring support requests.
- **Problem Solving | Incident Management:** Independently analyzing 10+ incidents per month – from triage and root cause analysis to sustainable fixes in Linux, networking, and monitoring.

Career Break

07.2022 – 10.2024

- Relocation and integration in Germany; German courses (B2).

- **Leadership | Team Management:** Leading a seven-person support team (support engineers and field technicians) across 25+ customer sites to improve response times and first-call resolution.
- **People Development | Coaching:** Recruiting, onboarding, and developing 6+ employees through structured onboarding, training programs, and skill matrices.
- **Communication | Conflict Management:** Successfully mediating 20+ escalated customer cases per year through solution-oriented communication and sustainable root cause analysis.
- **Process Optimization | Strategic Thinking:** Consolidating 12+ tools into four standard platforms to reduce operating costs and simplify administration.
- **Documentation | Knowledge Management:** Creating 30+ technical guides for support engineers and end users to accelerate onboarding and reduce recurring L1 requests.
- **IT Security | Infrastructure Management:** Administering and securing Windows Server and Active Directory infrastructures (DNS, RDP, GPO) with 500+ AD objects in multi-tenant environments.
- **Network Administration | Problem Solving:** Optimizing MikroTik WAN/LAN infrastructures for multi-site customers to ensure stable connectivity for POS, VoIP, and branch systems.
- **Virtualization | High Availability:** Operating VMware ESXi and Hyper-V infrastructures with 350+ VMs and 99.9% availability for production business systems.
- **Vendor Management | Service Coordination:** Managing external providers and SLA for VoIP, CCTV, access control, POS, and printing systems with 8,000+ endpoints.
- **Database Administration | Quality Focus:** Maintaining 1C and MS SQL systems for multiple customers, ensuring consistent backups and business-critical application availability.

IT System Administrator / IT Manager
Taurt Medical, Kherson

Side role | 09.2020 – 06.2021

- **IT Management | Leadership:** Full responsibility for IT infrastructure of a three-site clinic network, coordinating a four-person team and external providers.
- **Project Management | Infrastructure Build-out:** Planning, procurement, and successful implementation of complete IT infrastructure – from server room and networks to production go-live – within nine months.
- **System Integration | Analytical Thinking:** Integrating a DICOM/PACS system with five medical imaging modalities for efficient digital data exchange in clinical environments.
- **IT Operations | Reliability:** Ensuring stable 24/7 operation of 250+ clinical and administrative endpoints without prolonged outages during the project.
- **Negotiation | Budget Responsibility:** Conducting supplier negotiations and coordinating procurement projects worth over \$1M USD, considering technical requirements, warranty terms, and delivery timelines.

EDUCATION

DevOps Academy (Intensive), EPAM Systems (CI/CD, Automation, Cloud), 2021

B.Sc. Cybernetics & Computer Engineering, Kherson National Technical University (EQF Level 6), 2010 – 2014
